

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 27, 2014 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (122 new fires)
New large fires:	4(*)
Large fires contained:	8
Uncontained large fires: **	28
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	8
Type 2 IMTs committed:	11

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 air tankers and support personnel from the 153rd Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

Northwest Area (PL 5)

New fires:	24
New large fires:	0
Uncontained large fires:	17
NIMOs committed:	1
Type 1 IMTs committed	5
Type 2 IMTs committed	8

Chiwaukum Complex, Okanogan/Wenatchee NF. IMT 1 (Dueitt). Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Creeping and smoldering. Numerous residences threatened. Evacuations, area and road closures in effect.

Carlton Complex, Northeast Region, DNR. IMT 1 (Opliger), IMT 1 (Blume), IMT 2 (Rabe), IMT 2 (Allbee) and NIMO (Hahnenberg). Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush. Creeping and smoldering with short runs and short-range spotting. Numerous residences threatened. Area and road closures in effect.

Kitten Complex (4 fires), Vale District, BLM. IMT 1 (Poncin). Twelve miles south of Ironside, OR. Brush. Isolated short runs and torching. Structures threatened. Sage-grouse habitat threatened.

Ochoco Complex, Ochoco NF. IMT 2 (Dunford). Twenty-eight miles east of Prineville, OR. Timber. Minimal fire behavior. Sage-grouse habitat threatened. No further information received.

Bridge 99 Complex, Deschutes NF. Transfer of command from IMT 2 (Fillis) back to the local unit will occur today. Twenty miles north of Sisters, OR. Mixed conifer, brush and grass. Smoldering. Structures threatened. Road and area closures in effect.

Logging Unit Complex (5 fires), Warm Springs Agency, BIA. IMT 1 (Schulte). Twenty-five miles northwest of Warm Springs, OR. Timber, medium logging slash and brush. Minimal fire behavior. Structures threatened.

Camp Creek, Vale District, BLM. Transfer of command from IMT 2 (Watts) back to the local unit will occur tomorrow. IMT is also managing the Buzzard Complex. Eleven miles southeast of Juntura, OR. Brush. Sage-grouse habitat threatened. No further information received.

Buzzard Complex, Burns District, BLM. Thirteen miles northwest of Riverside, OR. Juniper, brush and grass. Sage-grouse habitat threatened. No further information received.

Rye Valley, Vale District, BLM. Transfer of command from IMT 2 (Thorpe) back to the local unit will occur today. Fifteen miles northwest of Huntington, OR. Brush. Sage-grouse habitat threatened. No further information received.

Lone Mountain 1, North Cascades NP. IMT 2 (Hutton). Three miles northeast of Stehekin, WA. Timber and brush. Creeping. Area closures in effect.

Bingham Complex (2 fires), Willamette NF. Transfer of command from IMT 2 (Nickey) back to the local unit will occur today. Five miles east of Marion Forks, OR. Timber. Smoldering and creeping.

Shaniko Butte, Warm Springs Agency, BIA. Fifteen miles north of Warm Springs, OR. Juniper, brush and grass. Structures threatened. No new information.

Sunflower, Umatilla NF. Ten miles north of Monument, OR. Timber and grass. Creeping and smoldering.

Center, Prineville District, BLM. Started on private land three miles northeast of Post, OR. Juniper, brush and grass. Minimal fire behavior.

Predictive Services Discussion: It will be hot and dry for much of the western U.S. as a ridge of high pressure strengthens. Under the ridge, there will be monsoonal showers and wet thunderstorms over the central Rockies and southwest U.S. Isolated storms may develop in California and the Great Basin where moisture is scarce. Showers and thunderstorms are also expected from the Tennessee Valley northward through New England including most of the northeast U.S.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

BUILDING FIRELINE DOWNHILL WITH FIRE BELOW

Operational Engagement

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and down slope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing and where and when it might occur.

Have an idea? Have feedback? Share it.
